

CodeNova Business Website

Product Requirements Document (PRD)

Version: 1.0 **Product Type:** B2B Software & AI Agency Website **Primary Goal:** Lead Generation

1. Product Vision

- CodeNova is a professional technology agency website designed to present CodeNova as a software, AI and digital product development company. The website should generate qualified leads, showcase projects, explain services and convert visitors into consultation or quote requests.

2. Business Objectives

- Generate qualified client leads.
- Showcase CodeNova services and portfolio.
- Build trust and professional credibility.
- Allow visitors to request quotes and project estimates.
- Allow visitors to book consultations and contact CodeNova through WhatsApp.
- Create SEO-friendly service and industry landing pages.
- Support future Google Ads and conversion tracking.

3. Target Customers

- Local businesses needing websites, e-commerce or automation.
- Startups needing MVPs, SaaS products, mobile apps or custom software.
- International businesses seeking AI development and automation.
- Established businesses needing redesigns, dashboards, CRM systems or custom internal software.

4. Core Services

- Website Development
- Web Application Development
- Mobile App Development
- Desktop Application Development
- AI Agent Development
- AI Automation
- E-Commerce Development
- Custom Software Development
- UI/UX Design

- Business Automation
- Maintenance and Support

5. Website Structure

- Home
- Services → Website Development, Web Applications, Mobile Apps, Desktop Applications, AI Agents, AI Automation, E-Commerce, Custom Software, UI/UX
- Solutions → Business Automation, AI Customer Support, Lead Generation, CRM Solutions, Custom Business Systems
- Portfolio
- About
- Process
- Pricing
- Blog
- Contact
- Book Consultation
- Project Estimator
- Privacy Policy, Terms, Cookie Policy, Refund Policy

6. Homepage Requirements

- **Hero:** “We Build Digital Products That Move Businesses Forward.” Include primary CTA “Start Your Project” and secondary CTA “Explore Our Work”.
- **Services:** Display the complete service catalog including Desktop Application Development.
- **Why CodeNova:** Custom solutions, modern technology, business focus, scalable architecture, transparent process and long-term support.
- **Portfolio:** Project cards with category, description, technologies, image and case-study link.
- **Process:** Discovery → Strategy → Design → Development → Testing → Launch → Support.
- **AI Section:** AI agents, chatbots, voice agents, sales agents, lead qualification, document processing and workflow automation.
- **CTA:** Repeated conversion points for consultation, quote and WhatsApp contact.

7. Desktop Application Development

- Create a dedicated service page at /services/desktop-application-development.
- Explain that CodeNova can build Windows, macOS or cross-platform desktop applications based on project requirements.
- Example use cases: POS systems, inventory management, billing software, accounting tools, school/ERP systems, offline-first business tools, admin utilities and custom internal software.
- Recommended technology options may include Electron, Tauri, .NET/WPF, Java or other suitable technologies depending on requirements.

- Service page sections: Business Problem → Solution → Features → Platforms → Technology Options → Development Process → Portfolio/Examples → FAQ → Consultation CTA.
- Do not claim support for a platform or technology unless it is actually offered for the project.

8. Portfolio & Case Studies

- Each project should have a dedicated case-study page.
- Case-study structure: Overview → Problem → Solution → Features → Technology → Screenshots → Development Process → Results/Business Impact → CTA.
- Example projects can include LifeLink, CineBook and BFGI Assist when they are ready for public presentation.
- Only publish genuine client testimonials, results and claims.

9. Project Estimator

- Allow visitors to select project type: Website, Web App, Mobile App, Desktop App, AI Agent, AI Automation, E-Commerce or Custom Software.
- Allow complexity selection and feature checkboxes such as authentication, payments, admin panel, AI, maps, notifications, chat, analytics, APIs and database.
- Show an estimated project range with a clear note that it is an indicative estimate, not a final quote.
- CTA: "Discuss This Estimate".

10. Contact & Consultation

- Contact form fields: Name, Email, Phone, Company, Country, Service, Budget, Project Description and Timeline.
- Consultation form: Name, Email, Company, Project Type, Preferred Date, Preferred Time and Message.
- Add WhatsApp floating action with a prefilled project inquiry message.
- Store lead submissions securely for follow-up.

11. Lead Management & Admin Dashboard

- Dashboard metrics: total leads, new leads, qualified leads, projects, revenue, conversion rate and website visitors.
- Lead statuses: New, Contacted, Qualified, Proposal Sent, Negotiation, Won and Lost.
- Admin features: search, filters, notes, assignment, status updates, CSV export and lead detail view.
- Future CMS features: manage services, portfolio projects, blog posts, pricing and testimonials.

12. Blog & SEO

- Blog categories: AI, Web Development, Mobile Apps, Desktop Apps, Business Automation, Technology, Startups and Digital Transformation.
- Each important page should support title, meta description, canonical URL, Open Graph image and appropriate structured data.
- Create dedicated SEO landing pages for high-intent services such as website development, AI agents, AI automation, mobile app development, desktop application development and custom software.

- Use natural, useful content rather than keyword stuffing.

13. Analytics & Conversion Tracking

- Google Analytics
- Google Search Console
- Google Tag Manager
- Track contact submissions, WhatsApp clicks, phone clicks, consultation bookings, estimator usage, CTA clicks, traffic sources, country and device.

14. Design System

- Style: modern, premium, minimal, professional and technology-focused.
- Recommended colors: Primary #0F172A, Secondary #2563EB, Accent #06B6D4, Background #F8FAFC, White #FFFFFF, Text #111827, Muted #64748B.
- Use restrained animation and clear visual hierarchy. Avoid excessive gradients, fake statistics, fake logos and fake testimonials.

15. Responsive Requirements

- Mobile-first responsive design.
- Support mobile, tablet, laptop, desktop and large desktop layouts.
- Test at approximately 360px, 390px, 768px, 1024px, 1280px, 1440px and 1920px widths.
- Navigation should become a mobile menu with a clear CTA.

16. Recommended Technology Stack

- **Frontend:** Next.js + TypeScript + Tailwind CSS.
- **Backend:** Next.js API routes/server functions or Node.js.
- **Database:** Supabase PostgreSQL.
- **Authentication:** Supabase Auth.
- **Hosting:** Vercel.
- **Email:** Resend or Brevo.
- **Analytics:** Google Analytics + Search Console.

17. Security Requirements

- HTTPS, secure authentication, password hashing, input validation, rate limiting, CAPTCHA where appropriate, SQL injection protection, XSS protection, CSRF protection where applicable, secure environment variables and protected admin routes.
- Never expose private API keys in frontend code.

18. Performance Requirements

- Fast loading and mobile-first performance.
- Optimized and lazy-loaded images.
- Compressed assets and minimal unnecessary JavaScript.
- SEO-friendly semantic HTML.
- Target strong Google Lighthouse and Core Web Vitals performance where reasonably achievable.

19. Legal Pages

- Privacy Policy
- Terms & Conditions
- Cookie Policy
- Refund Policy
- Legal/business information should be accurate and reviewed for the applicable jurisdiction.

20. Development Phases

- **Phase 1 — Launch:** Home, Services, Desktop App service, Portfolio, About, Process, Contact, WhatsApp, Estimator, SEO, Analytics and legal pages.
- **Phase 2 — Business Operations:** Admin dashboard, lead CRM, blog CMS, consultation booking and email automation.
- **Phase 3 — Growth:** Client portal, project tracking, invoices/payments, AI chatbot, AI project estimator and automated lead qualification.

21. Key Functional Requirements

- FR-01: Users can navigate all public pages.
- FR-02: Users can submit contact forms.
- FR-03: Contact submissions are stored securely.
- FR-04: Admin can view and manage leads.
- FR-05: Users can request project estimates.
- FR-06: Users can contact CodeNova through WhatsApp.
- FR-07: Users can request/book consultations.
- FR-08: Admin can manage portfolio projects.
- FR-09: Admin can manage blog posts.
- FR-10: Admin can manage services and pricing.
- FR-11: Pages support SEO metadata.
- FR-12: Analytics and conversion tracking are supported.

22. Success Metrics

- Number of contact submissions, quote requests, consultation bookings and WhatsApp conversations.

- Organic traffic, search visibility, paid traffic and social traffic.
- Visitor-to-lead, lead-to-qualified-lead and qualified-lead-to-client conversion rates.
- Page speed, Core Web Vitals, uptime and error rate.

23. Ideal Conversion Journey

- Google / Social Media / Ads → CodeNova Website → Hero → Services → Portfolio → Why CodeNova → Process → Case Study → Project Estimator → Free Consultation → Lead Created → Admin Dashboard → Lead Qualified → Proposal → Client.

Core Positioning

CodeNova helps businesses turn ideas and business problems into modern software, AI solutions and digital products.

Note: This PRD is a product specification for planning and development. Pricing, technologies, claims, testimonials, client logos and business information should be updated with verified CodeNova details before launch.
